DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Nankee, II et al (US Patent No. 5881703). This reference teaches determining an alcohol concentration based on readings from an air/fuel ratio sensor. At least a first coarse update and a second fine tuned update are carried out. The second update is carried out after a period of time based on fuel injection pulse width accumulations to allow for the fuel to work its way through the fuel system. See the abstract, col. 3, lines 65 – col. 4, line 10, col. 4, line 22-31, col 5, lines 5-16 and col. 5, lines 62+.
